How to remote in/log-in SCM, Flagler Hospital (FH)

Remote In using; ***remote2.flaglerhospital.org***

download citrix, enter user ID & Password to access Citrix (*same as Allscripts*)

A screenshot of a web browser window showing the Citrix log-on page. The address bar displays 'https://remote2.flaglerhospital.org' with a red box highlighting the domain. The page has a dark blue background. On the left is the 'Flagler Health+' logo. On the right, the text 'Please log on' is at the top. Below it are two white input fields: 'User name' and 'Password'. At the bottom right is a large blue button labeled 'Log On'.

FLAGLER HEALTH+ CORE VALUES

- Provide the highest QUALITY of patient and family care
- Advance performance through INNOVATION
- Conduct ourselves with INTEGRITY
- Honor the legacy of SERVICE to our community

ALWAYS	NEVER
Focus on safety	Take short cuts
Be attentive	Be unapproachable
Provide comfort	Make someone feel like a burden
Be open to new ideas	Say "we've always done it that way"
Go the extra mile	Say "not my job"
Look to a solution	Say "I can't"
Be honest	Mislead
Be kind	Forget why we are here

The screenshot shows the 'XSTEST DONOTUSE INFORMATICS' interface. The 'Orders' tab is selected. The 'Order Summary' section lists various order categories with checkboxes: Patient Directives, Admission/Discharge/Transfer, Medication Protocol, IV Therapy, Pharmacy, Chemotherapy, Precautions, Laboratory, CardioPulmonary, Restraints, Cath Lab, and Diagnostic Imaging. A red box highlights the 'Order Section Box' containing these checkboxes. Another red box highlights the 'Pharmacy' checkbox in the 'Pharmacy' section of the order list.

Highlight order > Right click to DC/Cancel or click Discontinue/Cancel ICON

The screenshot shows a toolbar with icons for various actions: Display, Group, Reset, Add, Approve, Copy, Discontinue/Cancel, Discontinue, Modify, Reinstate, Release/Manage, Sign, and Ac. A red box highlights the 'Discontinue/Cancel' icon. Below the toolbar, a table shows a list of orders with columns for Order Summary, Order Date, and Status. The first order is 'baclofen Oral - Tablet ...[Known as Lioresal Oral] Give 10 milliGRAM(s) Gastrostomy Tube' with an order date of '05-12-2018' and status 'Active'.

View Order History

Right click on Order > View > History > Status

The screenshot shows a medical order management interface. On the left, there is a list of orders. The first order is highlighted: "glucagon Injectable - ... [Known as GLUCAGEN Injectable]". A right-click context menu is open over this order. The menu options include: Activate..., Add Specimen..., Approve/Verify..., Attach Document..., Complete, Copy/Reorder, Discontinue/Cancel..., Discontinue/Reorder, Extend Stop Date, Mark as Reviewed..., Modify Order, Modify Order Set, Print/Reprint Labels..., Reinstate..., Release/Manage Hold Orders..., Rx Generate Task..., and Sign... The "View" option is highlighted in blue. Below the "View" option, there is a sub-menu with the following options: Alerts, All Orders in this Series, Clinical Paths, Current Relevant Results, Document, Expert Advice (Drug Info), and History. The "History" option is highlighted with a red box. To the right of the "History" option, there is a "Modify Status" button, also highlighted with a red box.

ABSOLUTE CONTRAINDICATIONS:

- ☐ arterial puncture at a non-compressible site within 7 days
- ☐ current use of direct thrombin inhibitors or direct factor Xa i...
- ☐ SBP>185 or DBP>110 despite treatment
- ☐ recent intracranial/spinal sx, head trauma or CVA (<3 mos)
- ☐ history of intracranial hemorrhage/aneurysm, vascular malfo...
- ☐ history of: brain tumor
- ☐ active internal bleeding (< 22 days)
- ☐ platelets <100,000
- ☐ PT > 15
- ☐ Heparin received within 48 hours with elevated PTT
- ☐ INR > 1.7
- ☐ known bleeding diathesis
- ☐ suspicion of subarachnoid hemorrhage
- ☐ CT demonstrates ICH or parenchymal hypodensity > 1/3 cere...

RELATIVE CONTRAINDICATIONS

- ☐ recent surgery or trauma <14 days
- ☐ seizure at onset
- ☐ recent GI or urinary tract hemorrhage within 21 days
- ☐ acute Myocardial Infarction or Pericarditis within 3 months
- ☐ IV/IA Thrombolytic (IV-tPa) within 24 hrs (here/elsewhere)
- ☐ glucose <50 or >400
- ☐ increased risk of bleeding due to co-morbid conditions
- ☐ pregnancy
- ☐ life expectancy <1 year or severe co-morbid illness
- ☐ contraindication (CMO) on admission
- ☐ patient/family refusal
- ☐ rapid improvement or stroke severity too mild

tPA Exclusion - Other Related Access or Consideration

OTHER RELATED FACTORS FOR CONSIDERATION

- ☐ stroke severity too severe with NIH score >25
- ☐ team unable to determine eligibility
- ☐ in-hospital time delay
- ☐ no IV access

Treatment Considerations

TPA ADMINISTRATION ☐ Patient meets criteria for tPA ☐ Patient does NOT meet criteria for tPA

CONSULTANT
[REDACTED]

HISTORY OF PRESENT ILLNESS
This patient is a 74-year-old white female, who at rest developed left-sided chest achiness going around to the back into the arm. She tried 1 nitroglycerin with perhaps minimal improvement. She said the discomfort lasted only 5-6 minutes. She has some belching. No nausea or vomiting. Mild dyspnea. Pain was nonpleuritic. She saw her chest wall was tender. She has not had any recent chest pain syndrome. She has known CAD with CABG x4 in 2011. At that time, she had LIMA to the LAD, saphenous vein graft to the right coronary artery, obtuse marginal 1 and 2 and TMR to the anterior wall.
