**CONSULTANT**

**HISTORY OF PRESENT ILLNESS**  
This patient is a 74-year-old white female, who at rest developed left-sided chest achiness going around to the back into the arm. She tired 1 nitroglycerin with perhaps minimal improvement. She said the discomfort lasted only 5-5 minutes. She has some belching. No nausea or vomiting. Mild dyspnea. Pain was nonpleuritic. She saw her chest wall was tender. She has not had any recent chest pain syndrome. She has known CAD with CABG x4 in 2011. At that time, she had LIMA to the LAD, saphenous vein graft to the...
